TROPICAL CYCLONE BULLETIN NR. 13F
Low Pressure Area (formerly "LUIS")
Issued at 11:00 PM, 03 August 2026

LUIS WEAKENED INTO A LOW PRESSURE AREA WHILE IN THE VICINITY OF PEÑABLANCA, CAGAYAN.

Location of Center (10:00 PM)

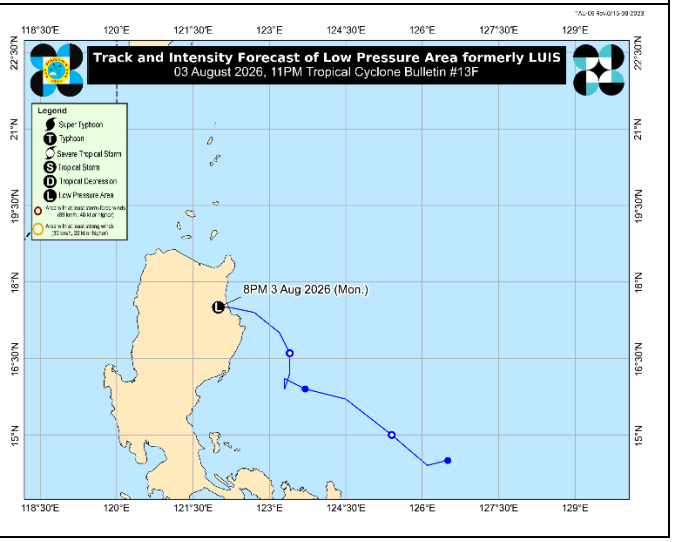
The center of Low Pressure Area (formerly "LUIS") was estimated based on all available data **in the vicinity of Peñablanca, Cagayan (17.6°N, 122.0°E).**

Intensity

Central pressure of **1002 hPa.**

Present Movement

West northwestward at 10 km/h



TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT

No Wind Signal is currently hoisted

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to **Weather Advisory No. 9 issued at 11:00 PM today** for the heavy rainfall outlook due to the Low Pressure Areas (LPAs) and the Southwest Monsoon.

Severe Winds

The Southwest Monsoon will bring **strong to gale-force gusts** over the following areas (especially in coastal and upland areas exposed to winds):

- **Today and Tomorrow (04 August):** Most of Luzon and Visayas, Zamboanga del Norte, Lanao del Norte, Misamis Occidental, Camiguin, Surigao del Norte, Dinagat Islands, Sarangani, Davao Occidental, and Davao Oriental.
- **Wednesday (05 August):** Most of the country.

HAZARDS AFFECTING COASTAL WATERS

24-Hour Sea Condition Outlook

Up to rough seas over the following coastal waters:

- **Up to 3.0 m:** The western seaboard of Pangasinan
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

Up to moderate seas over the following coastal waters:

- **Up to 2.5 m:** The seaboards of Isabela and Zambales; the northern and eastern seaboards of Polillo Islands; the northern seaboard of Camarines Norte; the eastern seaboard of Davao Oriental; the northeastern seaboard of Aurora.
- **Up to 2.0 m:** The seaboards of Batanes, Cagayan including Babuyan Islands, Ilocos Norte, Ilocos Sur, La Union, Surigao del Sur, and Davao Occidental; the western seaboards of Bataan, Cavite, Batangas, Occidental Mindoro including Lubang Islands, and Calamian Islands; the northern seaboard of Camarines Sur; the northern and eastern seaboards of Catanduanes and Northern Samar; the eastern seaboards of Albay, Sorsogon, Eastern Samar, Dinagat Islands, and Siargao-Bucas Grande Islands; the southern seaboard of Davao Oriental; the remaining seaboards of Pangasinan.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions**.

Other coastal waters have forecast wave heights of less than 2.0 m.

TRACK AND INTENSITY OUTLOOK

- **It must be emphasized that heavy rainfall and gusty conditions may still be experienced in certain localities. Refer to "Other Hazards affecting Land Areas" for more details.**
- Due to unfavorable conditions, LUIS has weakened into a Low Pressure Area at 8:00 PM today. The remnant low may still move generally east northeastward towards the Philippine Sea before becoming fully assimilated into the circulation of Tropical Cyclone DOLPHIN.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

Unless re-development occurs, this is the final bulletin for this weather disturbance.
